

WHAT IS CLAIMED IS:

1. A system for utilizing water originating from an air conditioning system in order to supply water to an automobile windshield wiper system, comprising:

5 air conditioning generating equipment for an automobile, the air conditioning generating equipment including an evaporating compartment;

a water-collecting container positioned below a level of the evaporating compartment;

10 a first arrangement for connecting the evaporating compartment to the water-collecting container to supply water from the evaporating compartment to the water-collecting container;

a second arrangement for connecting the water-
15 collecting container to a windshield wiper system of the automobile; and

a pump for pumping the water from the water-collecting container to the windshield wiper system through the second arrangement.

20

2. A system according to claim 1, wherein said air conditioning generating equipment further comprises a compressor and a condenser.

3. A system according to claim 1, wherein said first arrangement includes tubing which connects the evaporating compartment to the water-collecting container.

5

4. A system according to claim 1, wherein the second arrangement includes tubing which connects the water-collecting container to a windshield wiper system.
